

Nikhil Kumar

Nikhil - congratulations on your recognition as "The Innovator" from our Q4FY23 S&O Town Hall.

Please see the nominations submitted from the team:

Nikhil has always gone above and beyond in assisting his team members with both regular and ad-hoc requests that included getting custom data models created from source data, building internal dashboards from Workfront, Tableau knowledge sharing, etc. Nikhil contributes hugely to many of our analytical projects from the backend and hence, it would be appropriate to say he is an unsung hero.

Nikhil built our first ever super data set that we can use to self-serve queries. This is a huge achievement for our team and will make the speed at which we can provide data and make decisions infinitely faster! He is the Tableau and SQL expert in our team and is enabling the rest of us to learn it, while also managing our intake and a team. He is a hero!
